O.E.S. Dinner-Dance Was Real Event

The dinner and dance given by the O.E.S. on Thursday evening, March 15th, was one of the most enjoyable occasions in many moons. The tables were beautifully decorated, largely in honor of St. Patrick, and occupied all the available space in Campbell's hall. The dinner, served by the girls of the Senior Girls' Club who made very charming waitresses, was of a character which reflected the competence of those who prepared it in the most complimentary manner, the menu from chicken potpie and potatoes to ice cream furnishing every appetizing delicacy which could tempt the diners to further effort.

In the absence of H. E. Gill, the position of toastmaster was ably filled by J. S. Collins, and the following toasts were honored:

The King.
Our Country—Proposed by W. C. Hoskins and replied to by E. F. Crawford.

Our Masonic Brethren—Proposed by Mrs. Woodhull, responded to by J. S. Collins.
Ladies Champion Chapter O.E.S.—Mr. Cooper.

Our visitors—Proposed by Mrs. Williamson, responded to by B. D. Hummon.

A solo by Mrs. C. McLean, reading by Mrs. Collins, solo G. A. Orr and piano solo by Miss Edna Orr were program features enjoyed by all.

At the conclusion of the banquet the tables were removed and dancing indulged in until about 1.30, when the gathering broke off. Music was supplied by the Junior Anderson orchestra, and Mr. Muir acted as accompanist during the evening.

Elks Acting on Halt Question

The Elks held their regular meeting here on Tuesday night and the big discussion was over a halt for Champion. There appears to be no doubt but that the Elks are going to put it over and everybody in the community should get behind them and boost for this much needed addition to the essentials for the town's welfare.

If the Elks will give us a halt they will certainly have accomplished a real benefit to the community and will deserve the support of all.

Come on "Bill," we are behind you.

Rapid progress has been made during the past few days in drying up the streets and roads and it will be but a short time until all roads will be passable. The fields, too, are making progress towards being dry enough for threshing in a short time. Thursday, in particular, with a high wind made a wonderful change in the situation.

Jack Leong was fined one dollar and costs for assaulting Elwood Granlin. The lightness of the penalty in this case, however, does not signify that a screwdriver or other weapon is a good way of handling a situation, even if there is more or less aggravation.

The Department of Education has reduced the amount of the debentures to be issued for the new school here from \$30,000 to \$25,000.

Mrs. G. Voisey and son left for Calgary on Saturday.

Golf Club to Hold Annual Meeting

The Champion Golf Club will hold their annual general meeting in The Canadian Bank of Commerce chambers on Monday the 26th instant, at 8 p.m. It is hoped that all those who are interested in golf, besides the old members of the club, will turn up at the meeting in order that the club may get away to a good start.

Now that the golfing season has commenced the club respectfully asks that those who have occasion to cross the golf course in cars will try to keep to the old trails in order that the course may be cut up as little as possible. The club has leased the grounds from the C.P.R. and is of course paying for the leases. It is hoped therefore that the privilege of crossing the course in cars will not be abused.

P.T.A. Social Ev'g Highly Successful

The P.T.A. social on Monday evening was well patronized despite bad roads and an enjoyable evening was spent, the event being held in the United Church. The program consisted of community singing, a recitation by Miss Leola Johnson, a number by the High School quartette (H. & D. Stephenson, D. Bond and J. McNaughton), Mr. R. L. Baker accompanying; piano solo, "The Rosary," G. McLean, Miss Bar-elay gave a very interesting address on "The Supervision of Home Study." Games followed which were enjoyed by old and young. Refreshments were served by a number of the ladies. Mrs. W. S. Ryan, president of the association, was in the chair.

Big Auction Sale Tuesday, March 27

On Tuesday, March 27th, the entire equipment of R. C. Crane's farm will be sold by public auction. Thirty-five horses, a complete line of implements and some household effects are included in the list. Anyone desiring equipment for spring work will do well to keep the date of this sale in mind. Everything is to be sold without reserve as Mr. Crane has sold his farm.

Chairman Hoskins and Sec. Treas. Cooper of the school board were in Edmonton at the week-end, completing arrangements with the Dept. of Education with reference to the erection of the new public school.

As far as can be learned all the scarlet fever patients are doing well. While several cases have been reported these are mostly in the families exposed by being quarantined with the patients.

K. R. McLean, 210 212 Herald Bldg., Calgary, sight specialist wishes to announce that he will visit Champion, at the drug store Friday, March 30, 1928.

Turkey Matlock has discovered a badger too wise for the wiles of a man with a trap. This specimen has defences which cannot be surmounted.

Id Ditto and O. C. Ditto and wife, left for Spokane on Saturday on receipt of the news that Mrs. Ditto Sr. was seriously ill there.

THURSDAY, March 22, 1928

NOTES AND COMMENT.

The session of the legislature just closing at Edmonton has been an uneventful one to the great mass of the people in the province. As usual a large number of bills have been passed but their application to the problems being met are yet to be proved. The possible sale of the northern railways at a satisfactory figure is the best piece of news available from this session of the legislature.

Now coal is to be carried to Ontario for \$6.76 per ton. This should result in a considerable improvement in coal mining conditions in Alberta during the coming year. What is hard to understand, however, is why the Manitoba and Eastern Saskatchewan market is not also made more profitable to coal from this province.

There is a persistent number of petty thefts in this town which are very aggravating, because in many instances the articles taken are of very little use to the thieves but important in most instances to the owner. In nearly every instance the value of the articles taken is not large enough to justify a call on the police, leading to the conclusion that juveniles are largely responsible. Granting this to be the case the remedy is in the hands of the parents to a very great extent as some of the stolen articles must turn up somewhere. A general effort should be made to remedy the present situation and if the smaller children can be eliminated it will be but a short time until any older operator will be located.

NEWS NOTES

The 1928 Annual Convention of the Canadian Weekly Newspaper Association will be held in Edmonton during the first week of July, according to a decision reached at a recent meeting in Ottawa. Over 200 members of the association from all parts of the Dominion are expected to attend the convention. In addition to regular business sessions, trips to the surrounding district and to Jasper Park are planned as features of the gathering.

What is regarded by oil men as one of the most significant strikes since Royalite No. 4 came into production in 1924 is the blowing in of Dalhousie No. 1 well in the Turner Valley field during the past week, with a flow of wet gas estimated at some 10,000,000 cubic feet per day. Stimulated by this and a number of other recent strikes, trading in shares on the Calgary exchange has shown more activity than has been apparent for several months.

It is estimated that new settlers in the Vauxhall District of southern Alberta planted 17,000 trees around their

farm homes in 1927. Trees planted under similar conditions by earlier settlers in 1920 and 1921 have made splendid growth and done a great deal to encourage further efforts to beautify prairie farms in this way.

Hotel Marquis has been selected as the name of the new community Hotel under construction at Lethbridge. It is felt that the choice of this name commemorates the value of the introduction of which has done so much for agriculture in western Canada.

In the period between 1900 and 1927 inclusive, the value of the annual agricultural production of Alberta farms has increased over 26 times, as shown by the following figures compiled by the department of agriculture:

Year	Value of Production
1900	\$16,488,205
1901	\$18,988,217
1910	128,573,801
1920	284,213,030
1925	257,284,015
1926	303,031,910
1927	\$30,141,153

GOOD SEED

"Whatever a Man Soweth, That Shall He Also Reap."

What constitutes good seed? Good seed is the well ripened seed of a proven variety that will germinate well, be free from weather injury and disease, pure as to variety and free from weed seeds.

Seed that is badly weathered may not have good germination. There is a lot of seed produced in 1927 that was very badly weathered. Insure your crop by using only seed grain of proven germination.

Many of the different plant diseases are carried over on the seed. The formaldehyde and copper carbonate treatments are inexpensive and in all cases more than repay the cost of application.

Now only well graded seed. The cost of cleaning seed to eliminate kernels that are small in size or immature and light will pay for itself many times over. Small undeveloped kernels produce weak plants that are smothered by their vigorous neighbors. Grain of this type is of more value for feed than seed.

One year's seedling of weed seeds means seven years weeding with the easiest controlled weeds and a life job for many of the noxious weeds. Eliminating weed seeds from seed grain will pay you handsome dividends.

Now only proven varieties. The varieties recommended by the Experimental Station, Lacombe, are Marquis, Red Bobs and Garnet Wheat; Banner and Victory Oats and O. A. C. 21 and Manchurian Barley. If you are not sure which variety to use, get in touch with your nearest Experimental Station, School of Agriculture, Agricultural Agent, the University of Alberta or the Provincial Department of Agriculture. The experience of any or all of these sources of information will be of value to you. Their advice is freely and gladly given.

The best way to get good seed is to grow it. This can be done to best advantage by preparing a seed plot of summer-fallow or breaking for a seed plot. Any one can easily calculate the acreage necessary to provide sufficient seed for the following crop year. This seed plot should be sown with special seed, preferably registered. Registered seed may be obtained from a member of the Canadian Seed Growers' Association or from the Provincial Seed Cleaning Plant at Edmonton.

A Want Advt. will do it.

CHEVROLET'S association with General Motors has given the "Bigger and Better" Chevrolet the advantages of the largest automotive research laboratory in the world... the largest automobile proving ground in the world and the world famous craftsmanship of Fisher bodies.

And it has done more... It has made the "Bigger and Better" Chevrolet a bigger and better value... because of the vast purchasing power of General Motors... because of the economies of enormous production schedules... because all the resources and strength of General Motors are back of Chevrolet in making this most outstanding car the most outstanding value in the low-priced field.

See this "Bigger and Better" Chevrolet at its new and lower prices. The G.M.A.C. General Motors' own deferred payment plan affords the most convenient and economical way of buying your Chevrolet on time.

Sweet Clover a Good Friend But a Bad Master And Must Be Kept Under Control

Like fire, sweet clover is a good friend but a bad master. After a hectic career of about 15 years it has been from a plant of universal condemnation as a dangerous weed, to one of the most popular crops in the country with many men, on nearly hand particularly, making a fortune out of it seed. Even at ten dollars and more a bushel it was planted widely all over Eastern Canada and made much headway in the West. Then a few years after the war the defects of sweet clover began to show up and it sank in popular esteem until today the markets are loaded with seed and farmers cannot get more than two dollars a bushel for it.

Go into any of the five Dominion Government Seed Laboratories, scattered across the Dominion, and you will find that sweet clover makes most samples of other clover and alfalfa. Seedmen will tell you that scores of good red clover, alsike, and alfalfa seed producing districts have been ruined by this weed, because it is a weed when growing with other crops, which comes up with the other crops, goes to seed at the same time, and because the seed of sweet clover is about the same size and weight as that of the others it is very common on the table, but few people realize the great trouble taken in their cultivation. They are the most important weeds of the island of Majorca, where many varieties are cultivated, and the industry is so prosperous that as old olive trees die they are replaced by sweet clover.

When the almonds are almost ripe they are knocked off the branches by hand banoo poles and then picked up by women and children. The nuts are separated from the husks after drying, and the shells are then broken by hand or machinery and the kernels extracted.

But again, like fire, sweet clover has a very real place in modern agriculture. If it is handled properly, At the Government experimental farms there is no trouble with sweet clover, because it is kept under control. Even in seed producing districts it can be grown, though the big seed buyers warn growers against the use of it as fertilizer, since its pasture and weed smotherer, sweet clover has a very real place, and on account of its qualities in these respects, it will probably always be grown in Canada, although no one expects to see big prices for seed again. There is no possible chance of sweet clover in Europe and being a big yielder of seed and so widely planted both here and in United States, there is no possible chance of its recurrence of the boom period, and for the sake of the good qualities of the plant, it will that these days do not recur. When seed prices for it were soaring the crop was planted everywhere before it was understood and the reaction which followed the appearance of its defects more than offset the advantage of its recent popularity.

But the secret of growing sweet clover is to prevent it from becoming seed. Too much emphasis cannot be laid on this point. It must be sown early and cut before it commences to go to seed. If used as pasture it must be kept grazed closely or the stock will turn to something else and the clover will go to seed coming up in other crops later in the year. It must be scarified before sowing so that every seed will germinate or else none of the harder seeds will live over one, two or even more seasons germinating later and polluting the crop coming on. In special seed growing sections, such as Peel County, where alfalfa is a major crop, or in the Elgin or Mariposa alaska districts in Ontario, or in the Erieola alfalfa area of Alberta, seed experts advise growers not to touch sweet clover at all. The risk is too great of it getting mixed with the alfalfa, sile, or other clover and polluting the quality of the crops produced. If these growers could band together and prohibit sweet clover in these specialized sections altogether, it would be adequate protection. At all events they should insist that no threshers which have been operating in districts where sweet clover is grown should touch their own crops as the machines will carry sweet clover seeds and mix them with the seed of alfalfa and other sile. The seed may also be spread through manure or straw from farms growing this crop.

Alfalfa, red clover, timothy and mixtures of the three are unrivaled for hay and the alfalfa and the red clover will hold up the land. The seed of all three, if grown from good stock on a clean field, will always be worth money, but where handled properly sweet clover has a place as a fertilizer, silage or a weed smothering crop.

Pauline: "And shall I return your letters?"
Fred: "Yes, there is some good material in them I can use again."

Who Won the War

Sir Harry Lauder Gave Best Answer To Question

The old question of who won the war was revived by the Toronto Post in its editorial columns. In this connection, we can recall a story told by Sir Harry Lauder at a reception given in his honor on a tour of Canada some years ago, according to his story, when asked as to his opinion, he replied as follows:

"You wanted my opinion, and here it is: I want to tell you that English and the Irish, the Welsh and the French, the Belgians and the Yankees, the Australians and the New Zealanders and the South Africans, helped the Scots somewhat to win the war."

Probably the famous Scottish humorist was not for wrong in his estimation of the situation, and the arrangement of the various nations can be changed to suit the nationality of the individual.

Almond Industry Profitable

Many Varieties Are Cultivated On Island of Majorca

Almonds have a prominent place on the table, but few people realize the great trouble taken in their cultivation. They are the most important weeds of the island of Majorca, where many varieties are cultivated, and the industry is so prosperous that as old olive trees die they are replaced by sweet clover.

When the almonds are almost ripe they are knocked off the branches by hand banoo poles and then picked up by women and children. The nuts are separated from the husks after drying, and the shells are then broken by hand or machinery and the kernels extracted.

Winnipeg Newspaper Union

British Columbia is shipping more dairy cattle to China and, despite political uncertainty there, the market for good stock continues in a buoyant condition, according to Dr. A. Knight, provincial livestock commissioner.

A shipment of 25 pure-bred and grade Jersey and Guernsey cows recently went out to Hong Kong for the Faran, Dairy and Cold Storage Company there and further shipments will be sent during the spring.

Just a Bit Mixed

Uncle Ezra: "How did your automobile accident happen?"
Uncle Ezra: "Well, you see, there's one thing you keep your eye on, and another one you keep your foot on, and I guess I got my anatomy in the wrong place."

Attractive Bandana and Bloomers

Extremely well-fitting are the attractive bandana and bloomer pictures here for ladies and misses. Ranching In B.C. Improves

Outlook Is Better Than For Many Years Says Old Operator

The cattle business of British Columbia is beginning to lift its head, stride again, and the outlook for the rancher is better than for many years, according to C. G. Cowan, operator of some of the largest ranches in the Cariboo, including those owned by the Marquis of Exeter, Lord Egmont, and the Cariboo Trading Company.

Ever since the boom years of the war British Columbia's cattle business has languished. The province's enormous productive capacity has been practically no competition in the selling market. Now, however, Mr. Cowan states, the situation is entirely changed. Competition has come for B.C. cattle and has come to stay.

The upward trend in market conditions will result in large expenditures on ranch improvements. Several thousand additional head of cattle will be brought in, and as a side-line, 3,000 head of sheep will be imported by Mr. Cowan alone from the ranges of Oregon. Irrigation ditches will be built on many of the larger ranches to provide greater facilities for feed production.

Trying To Collect Back Taxes

Federal Government Claims Arrears From Western Wheat Producers

The controversy between the Federal Income Tax Department of Ottawa and the Western Wheat Pool may result in amount aggregating millions of dollars, being collected by the Treasury for arrears in tax payments.

The point at issue is whether or not the two or three cents per bushel which the pools deduct for the purpose of irrigating ditches, for the grain handled should be treated as taxable income.

The Federal Department claims these are taxable, and the pools say that the pools pay up for all collections made since their inception. Many millions of dollars have been collected by the pools in this manner and the latter have never shown these deductions as taxable income.

There are 4,000 country grain elevators in Western Canada, five-fifths of which are owned or controlled by the Canadian Wheat Pool, the largest farmers' co-operative organization in the world.

Shipping Cattle To China

Market For Dairy Stock From B.C. Is Still Good

British Columbia is shipping more dairy cattle to China and, despite political uncertainty there, the market for good stock continues in a buoyant condition, according to Dr. A. Knight, provincial livestock commissioner.

A shipment of 25 pure-bred and grade Jersey and Guernsey cows recently went out to Hong Kong for the Faran, Dairy and Cold Storage Company there and further shipments will be sent during the spring.

Buy At Home—You Sell There

Patronize Your Local Merchant and Build Up Your Own Community. Patronize your local merchant. Any profit he may make through your trade goes toward the betterment of his home town—and yours. His home benefits your town. His taxes help keep yours down. His contributions to local charities prove that his interests lie where yours do.

His advertisements in the local papers enable ye editor to build another home, donate still further to local needs, and supply better material for your reading hours.

Your local merchant buys your produce. He sells it to your friends. If you sell at home and buy elsewhere, you will soon become an underclass to live.

The gold in the distant cities may attract, but long ago it was learned that "all is not gold that glitters."

Modern banking originated in Italy.

Canada's Copper Industry

Dominion Rapidly Climbing To Third Place In Production

That within the next 10 years Canada will become the world's third largest producer of copper, being then surpassed in this field only by the U.S. and Chile, was the prediction made by Sydney J. Cook, chief of the mining, metallurgical and chemical branch, Dominion Bureau of Statistics, Ottawa, during an address on Canada's future in copper, given at the annual general meeting of the Canadian Institute of Mining and Metallurgy in Quebec.

Mr. Cook said that although Canada now produces only about five per cent of the world's output of copper, an enormous increase in production will be possible through the development of the newer fields that are just now coming to the front, such as the Ronny District in Quebec, the Frodo mine area near Sudbury, in Ontario, and the several copper properties in Manitoba.

The speaker forecast no diminution in the per capita consumption of copper, but rather the probability of a large increase in the use of this metal.

H.B. Railway Possibilities

Coast Line Of Hudson Bay Greater Than That Of Canadian Coast Line

Few people realize the immensity of the territory which will be opened up for development with the completion of the Hudson's Bay Railway. The shore line of the Bay itself for example, is greater than that of the Canadian Atlantic coast line.

With a coast line of these proportions the contiguous country, at present barely scratched by those pioneers of commerce, the surveyor and the prospector, should be large enough to yield a good business for a new railway line, apart from through shipment of wheat and perhaps livestock for export trade. Fur, fish, minerals, pulpwood and agricultural produce—all or any of these may be available in sufficient quantity to make the new line pay its way in a very short time without the heavier traffic for which the line is being primarily built—primarily, at least, from the viewpoint of the Western Canadian farmer.

The possibilities of the Hudson's Bay Railway are greater than perhaps even the most discerning can yet see—Saskatchewan Farmer.

Buy At Home—You Sell There

Naval Agreement Between Britain and U. S. Would Be Big Step Towards World Peace

Holds World's Record

Now Owned By University Of B.C. Is Sustaining Her Reputation

There is a bird in British Columbia which seems to be the prototype of that well-known fowl that "laid the golden eggs." "Maize" is the name of the famous White Leghorn, owned by the University of British Columbia, which, because of her egg-laying proclivities, has had greatness thrust upon her. This remarkable hen has already a world's record to her credit, having laid 251 eggs in one year, and she has more than sustained her reputation in the new year. According to the Brampton Express, "Maize" production brought to the university last year cash proceeds of \$2,225. Included in this was \$500 each for two cockerels; another cockerel sold for \$300, and several hundred eggs brought \$125 to the coffers of the university. It can hardly be wondered that this Western institution has refused all offers to part with "Maize," although high cash offers have been made. Apart from the value of this hen as a revenue producer, it is an advertisement for the university that cannot be measured in dollars and cents. It has probably done more to make the University of British Columbia known throughout the American Continent than any other single factor since the institution was founded.

"We recognize that commercial prosperity which once was Britain's has passed to the United States," he said. "Because of this we recognize entering into a naval building competition with you would be to court disaster. That is why I am convinced that the light cruiser problem will not long remain a point of difference."

In the next war the battle line will be the centre of production, instead of ditches in muddy fields. The civilization of the countries involved will receive crushing blows.

Believes New Wheat Is Rust Resistant

Discovery By Dr. Seager Wheeler Of Southern Saskatchewan

A new variety of wheat which he thinks will be substantially rust resistant and at the same time be suitable for milling purposes has been discovered by Dr. Seager Wheeler of Southern Saskatchewan. Dr. Wheeler announced while speaking on the danger of rust in Western Canada, at the annual banquet of the Southern Branch of the Canadian Association of Trade, Dr. Wheeler announced that the new wheat is a cross breed from Kola. He has been growing wheat for the past 40 years and for the last 20 years has endeavored to obtain a rust resistant variety. He states that this Kola cross breed will be most likely what was desired by the Western farmer. Experiments are being made with this wheat at Ottawa, Saskatoon and in Manitoba and Indiana.

No Cause For Worry

In one of the infant classes of a certain large school the teacher had noticed that a great friendship existed between John and Little Joan, two of her pupils.

John was a bright youngster, but he wasn't disposed to work over hard, and his teacher had said that unless he worked harder he would not be moved up at the end of the year.

"You must try harder," she told him, "or you won't pass. And if you have to stay here another term you'll lose Little Joan. How'd you like that?"

"Oh," replied John blandly, "I expect there'll be other little Joans."

Fifteen women over 100 years old died in 1922.

Might Have Laughed

The Senator and the Major were walking up the avenue. The Senator was over middle age and considered more than fat, and, dearly as the Major loved him, he also loved his jokes. The Senator turned with a pleased expression on his benign countenance and said:

"Major, did you see that pretty girl smiling at us as we passed?"
"Oh, that's nothing," replied his friend. "The first time I saw you I laughed out loud."

"I have a very economical wife. Yesterday she made me a necktie out of one of her old dresses."

"Her yesterday my wife made herself a dress out of one of my neckties!"—
Dr. Brunner, Berlin.

WORLD HAPPENINGS BRIEFLY TOLD

The London Daily Mirror says that John L. Baird, inventor of television, intends to test his apparatus by transmitting to an aeroplane in the near future.

The Turkish Government announces that it has accepted the League of Nations invitation to participate in the preparatory conference for the limitation of armaments.

Several naval powers appear to believe that the boat has decided to report that Japan is negotiating with the Soviet for concessions in Siberia and the exploitation of the resources of North Manchuria.

Twelve Bristol aeroplanes, bought in Great Britain for use by the Mexican air force, have arrived at Vera Cruz. Two other planes were sent on approval and, if satisfactory, more will be ordered.

The Saskatchewan Pool announces that up to date the board has decided to acquire elevators at 89 cents. Tenders for the construction of 47 of these elevators were accepted recently by the executive.

Miss Mercedes Glantz, London typist, abandoned her third attempt to swim the Straits of Gibraltar when within a mile and a quarter of the African coast. The rough seas and unfavorable currents were blamed for her failure.

Alexis I. Rykoff, president of the council of commissioners, reports that all difficulties in purchasing grain for Russian towns have been surmounted and that the government expected to purchase 4,000,000 tons here for the first quarter of the year had ended.

The first university course in aeronautical engineering in Canada has been inaugurated at the University of Toronto by the faculty of applied science and engineering, and has been given the approval of the board of governors and the senate of the university.

The federal government is not exempt from the Workmen's Compensation Act, and neither are any of its ministers. It was ruled in a Quebec court, when Ernest Lusk successfully sued the deputy minister of marine and fisheries for injuries sustained while at work on board the government steamer Montcalm.

It Will Prevent Ekerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. And a little sugar to it, in London, a Quebec court, when Ernest Lusk successfully sued the deputy minister of marine and fisheries for injuries sustained while at work on board the government steamer Montcalm.

Good Yields in Irrigated District.—An average of 33.7 bushels of wheat per acre was produced on lands in the Lethbridge (Alberta), Northern Irrigation District in 1927, the total being 1,967,781 bushels on 59,611 acres. The total value of all production in the district, including grain, fodder crops, dairying and poultry, is \$2,085,000 as compared with \$1,528,000 in 1926. The increase in production in three years has been over 500 per cent.

Jones—"So your son's studying Journalism—writing for money?"
Father—"Yes, I got a letter from him yesterday."

Are You Nervous? Sleepless?
St. Catharines, Ont.—"I was in such a nervous and random state of mind that I could hardly get around to do my work. I could not sleep and the least noise would wake me. I was completely exhausted. I had taken a lot of doctor's medicine, but it did me no good, only for the time being, as reading in the B.B.I. I found out about Dr. Williams' Pink Pills. I decided to try them and found them to be just what I needed. I am now a healthy man and I feel that I owe my life to them."

I have always maintained," declared Charles, "that no two people on earth think alike."
"You'll change your mind," said his fiancée, "when you look over our wedding presents."
The sum is \$9,000,000 miles from the earth.

A good thing may be cheap, but a cheap thing is seldom good.

Milburn's Liniment Sales Agents.

Aluminum possesses qualities of lightness, cleanliness and protection against rust and dust which make it comparable as a container for fine tea. You will never find a taste in the Red Rose Tea because it is put up exclusively in damp-proof aluminum packages.

Losing Zeit For War

German Now Prize Peace Says

Germany, whatever her alliance may be, will do all in her power to remain neutral in any war that may ensue mankind in the far or immediate future.

Enlist Ludwig, noted biographer, as expressed himself at Orchestra Hall, New York.

It will henceforth prize peace, he said, for these three reasons:

"First, because the royal prerogative to decree war does not exist any more in Germany."

"Second, because Germany has the greatest percentage of workmen today who are die-hard pacifists."

"Third, because they realize they will be better off by remaining neutral."

Former Field Marshal von Hindenburg, declared Ludwig, will be re-elected president of the new republic as long as he lives.

"There are no symptoms of a return to the monarchy," he said. "On the contrary, since we are governed by the old conservative families, the republic is safer than before."

The citizen sees the Kaiser's old field marshal steering allegiance to the new constitution, he says: "It must be all right."

The Feeding Of Babies

From time immemorial it has been recognized that babies thrive best when breast-fed, and it is the ambition of every mother to nurse her baby. But since it frequently happens that this is not practicable for one reason or another, the young mother looks about most anxiously for that food which will best take the place of the natural food which is not obtainable. It is essential that the food used should be absolutely pure, that it should contain all the necessary elements of nourishment for the child, and finally that it should be easily digestible. For three generations Borden's Eagle Brand Condensed Milk has been the standby of mothers who have learned to nurse their babies. It is a leading infants' food, more Eagle Brand being used than the combined total of all others. It measures up to the requirements of the infants perfectly, and nearly all babies thrive on it from the first feeding.

Worms sap the strength and undermine the health of the child. Strengthen them by using Mother's Worm Expeller to drive out the parasites.

Issuing Series Of Historic Postcards

British State Papers Will Be Photographed For This Purpose

To popularize history, the Public Record Office in London is about to issue a series of postcards made from photographs of some of the state papers contained in the archives. The subjects include: The original draft of the log of Nelson's flagship on the two days after the battle of Trafalgar; a signature of Shakespeare; Sir Philip Sidney's last letter; the indenture to Magna Carta; a page of the treaty violated by Germany in invading Belgium; a picture of the two volumes of Domesday Book.

Ruin of a city, believed to be a thousands years older than Rome, have been discovered near Ferrara, Italy.

Short Of Breath

Dizzy, Sinking Spells COULDN'T WALK FAR

Mr. L. A. Oliver, Granville Ferry, N.B., writes: "A few years ago I had a sinking spell at night, and I hardly slept without taking half of something to support me, and I could not walk any distance on account of being so short of breath."

"I had taken a lot of doctor's medicine, but it did me no good, only for the time being, as reading in the B.B.I. I found out about Dr. Williams' Pink Pills. I decided to try them and found them to be just what I needed. I am now a healthy man and I feel that I owe my life to them."

Aviator Crashed Into Sea

British Flier Killed While Aiming At

Speed Record
Flight Lieutenant S. M. Kinkead, noted British speed pilot, flying at terrific speed, dived into the sea at Southampton, England, leaving no trace, while attempting to break the world speed record.

One of the victims British Schneider cup team of last year, was piloting the same type of machine with which, Flight Lieutenant E. N. Webster won the Schneider trophy with an average of 281 miles an hour.

Later, Kinkead had made his first trial flight in a Royal Air Force "wonder plane," and then he had his second flight after which he declared the Schneider cup races, Lieut. Kinkead was convinced he would make more than 300 miles an hour.

The machine that he used was a super-marine Napier 8-5. During the Schneider cup races, Lieut. Kinkead made a speed of 291 miles an hour, the highest rate attained over one lap in the race, but was forced to withdraw after completing the third lap.

The record which the British aviators made, shows that they realize the established shorth after the Schneider cup races by Major Mario De Barmadi, Italian speed, who flew at 294 miles an hour.

ARE PALE PEOPLE WELL?

Some pale people are well, but not many. Pale people generally means thin people. In addition, you are short of breath, and your heart palpitates. You will feel nervous, and perhaps show symptoms of indigestion. Dr. Williams' Pink Pills will do about it. You are in an emaciated condition.

Dr. Williams' Pink Pills are the logical remedy for anemia, for they build up the blood, strengthen the nerves, improve the appetite and aid digestion. But do not wait too long. Thin blood is a stealthy and dangerous foe.

Recipes For This Week

(By Doty Barclay)

QUICK SWEETS
1 cup flour.
2 teaspoons baking powder.
1/2 teaspoon salt.

1/2 cup sugar, shortening.
1/2 cup milk.
1 cup sifted raisins.

1/2 cup brown sugar.
2 teaspoons butter.
1 teaspoon cinnamon.

Mix together flour, salt and baking powder. Cut in shortening and add sufficient milk to make a soft dough. Roll 1/4 inch thick. Cut in 4-inch squares. Place a small handful of raisins in the centre of each, with one teaspoon sugar and 1/2 teaspoon butter. Wet edges of dough with cold water and fold over the raisins, pressing edges tightly together. Brush with milk and roll in remaining sugar and cinnamon which have been mixed together. Place 3, teaspoon butter on top of each sweet and bake in moderate oven (350 degrees F.), 15 minutes. Serve hot with lemon sauce made as follows:

1 cup sugar.
1 cup butter.
2 tablespoons flour.
1 tablespoon lemon extract.
1 cup boiling water.

Cream butter with sugar and flour. Add boiling water and boil one minute. Remove from fire, add lemon extract, and serve hot.

VEGETABLE PLATTER

Four or five cooked, well-buttered and seasoned vegetables arranged attractively on a plate around some exposed vegetable, an potato, onion, or cauliflower, form a satisfying and nutritious dinner. Add 1 to 3 tablespoons of butter to a cup of hot vegetable.

Sun Caused Fire

The heat of the sun caused a fire in one of the windows of a jewellery shop in Sydney, Australia. The window was streaked with toilet requisites, in which material of a highly inflammable nature is used, and the heat caused the brushes and other articles to become ignited. The plate-glass window was broken, and the contents of the window completely destroyed.

There is a small island off the coast of Ireland, which is inhabited by only fourteen families.

A fool can do more damage in a minute than a wise man can undo in six months.

What worries most Canadians is not so much status as static.

SUNDAY SCHOOL LESSON

MARCH 25

JESUS PROCLAIMS THE KINGDOM OF GOD

Golden Text: "And Jesus went about all the cities and the villages, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of diseases, and all manner of sicknesses."—Matthew 9:35.

Devotional Reading: Malachi 4:1-4.

Review By Means Of Allusions

I do not expect the Union to be dissolved. I do not expect the house to fall, but I do expect it will come to be divided.—Lincoln.

I am confident that should every foreigner be forced to withdraw, the grain of mustard seed will grow. Churches that live will have such vitality that the good news will be spread.—A Chinese Missionary.

One touch upon his garment's fringe still healed the hurt of bitter years. Before him yet the demons cowered. He gives the wine of joy for tears.—Margaret Fuller.

This characterization comes primarily near to being akin to the sin of the old when they were in the habit of which was good to the action of the spirit of evil. A more careful analysis of the social aspirations now forming vocal in all lands would show that a strong and healthy nation would be that is destined to bind the forces of evil and to bring working injury to the weak.—John Reynolds Brown.

"Whatever the fever, his touch can heal it."

The healing of His seamless dress. By His beds of pain; We touch Him in life's throes and groans. And we are whole again.

If you find that one door is blocked try another; and if no ordinary way will open, try the roof, and make your departure. Love is inventive, and enthusiasm is persistent.—Samuel Chadeville.

The new wine of liberty is fermenting in the ancient bottles of custom and tradition.—A Russian writer.

The God there. There is no harm can come to those who trust in Him. He not who rules both wind and wave. Whose laws are kind and just.—Percy Bysshe Shelley.

Our own sorry souls are made up of the accumulated attitudes, preferences, antipathies, loves, fears, hatreds, forgiveness, which we take up and exercise towards our fellows. In view of all that, let us take down into our thoughts and practice the message of these words, "How can Satan cast out Satan?"—John A. Tuck.

Both It In For Lame Back.—A lame, rubbing with Dr. Williams' Electric Oil will relieve lame back. The oil will penetrate the tissues and relieve the pain. Try it, and you will be convinced. As the liniment sinks in, the pain comes out, and there are ample grounds for saying it is an excellent article.

Experiments have demonstrated that it is possible to grow certain hardy fruits on the prairie. If there is anything in it, the time will come when Northern Spy apples will be frost-proof.

People who have no sense of humor set mighty funny at times.

The electric unit known as the volt takes its name from Alessandro Volta, who made the first voltaic battery.

CHAPTER XX.—Continued

"Do you think I would marry you to a decent boy—a boy of good family—who was foolish enough to think of marrying a foreigner of whom he knew nothing, and of whom the police have considerable knowledge?"

Helmi leaned over and scanned the paper. Her own picture stared at her. For a moment she forgot everything but the pleasant memories it brought to mind of Miss Abbie's house and its kindly shelter. The picture was taken in front of the house; she had worn her white mink and plumed hat. She remembered now that Mrs. Wynne had asked for a photo—it was one of the rules of the House.

"Helmi Milander, young Finnish girl who escaped from the Girls' Friendly Home. Arrested here a year ago in the worst Chinese den in the city." Helmi recoiled, and would have fallen had not Major Gosssett sprang to her assistance and placed her in a chair.

"Do you deny this?" asked the Magistrate, when he thought she was sufficiently recovered to speak.

"No," said Helmi faintly, "that's my picture, but it's all a lie."

"Of course, they all say that."

"Well, at least you can understand that I was not anxious to marry you to young Doun or any decent man."

The BABY

Why do so many, many babies today escape all the little fretful plagues and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and gentle to the stomach, and its gentle influence makes it the most perfect of the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, and you may give it freely, at first sign of colic, or constipation, or diarrhea, or those unwholesome eruptions you just don't know what the doctor always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

W. N. U. 1739

Recommend Co-Operative

Marketing Of Live Stock

Saskatchewan Overseas Live Stock Marketing Commission Makes Report

Co-operative marketing is the first of eight main recommendations of the Saskatchewan Overseas Live Stock Marketing Commission to the Legislature of Saskatchewan. The Commission was appointed early in 1927 by the Saskatchewan Agricultural Research Foundation and directed to make an investigation relative to the marketing of Canadian Live Stock in Great Britain and to study co-operative bacon factories in England, Ireland and Denmark. The Commission was made up of five men who investigated conditions in the countries named and also in Poland, Germany and Holland.

The creation in Canada of a department or bureau of agricultural economics to study on marketing and other problems is also recommended by the commission.

"Tough luck, Helmi," said the nurse boss, "But we all know it wasn't your fault. He fooled you—that's all."

Mrs. McMan found her tongue—never a hard task for her. "Well, one thing sure, Helmi, you can't say I didn't warn you. I knew it means a girl to a girl when one of these city doles starts to go with her. They mean no good to any girl. I tell you a girl has to watch her step all the time. I can't keep you here. I'd keep you if I could, but there's so much talk of this, that and the other, and I've always tried to run a decent house, but with so many comers and goers, and now that Mrs. McMan has gone I've got to be more careful. I guess you'd better go into the city. There's so many people there no one asks questions."

Mrs. McMan went on talking.

Helmi stood up and fixed the sunset and her eyes were looking far away. She did not hear what Mrs. McMan was saying. She was thinking of that sunset long ago—the night before she crossed the Canadian border—how it glowed and gleamed and beamed. She had been so sure it was a welcoming fire to warm and comfort her. She had come in full of hope and confidence, and sure she was of making her way, and finding friends. But these fires, these friendly fires, where were they now?

Her friend whom she loved had betrayed her into hostile hands. And now her Jack! Was Aunt Lili right after all? Was Jack a painted fire, too?—and God, her God, who had seemed so close and dear and loving to her, was just a painted fire, like the other, cold, and dead, and smothering, when she came to him crying and shivering, bitterly alone, and afraid.

The last page of cold faded in the sky and the night wind came whistling, cold and piercing, down the mountain pass.

Helmi shook to the collar of cold licking her hand.

CHAPTER XXI

Dead gardens, littered with stocks from which the life had fled, and the dried blossoms had departed, with all the sadness of the silent places where the life had fled, hunched over the newly courted graves where the potatoes and turnips now lie buried; dead fields cleared out, swept clean and tidied away like the house of trouble where the neighbors gather and do this and that service for the one who is gone; leaden stubble whose Helmi had not forgotten them; no birds at all except the little graybirds who sing no song and whose coats are the color of dust; the frozen winds of December that rook with rage at any spot of brightness; every white that rage all day and moon at night as if they had repented of their evil ways, but whose sorrow is only for the works of destruction which they were not able to undo; the harvest past, the summer gone, stars melancholy over all, so that the cold, gray, desolate time which we enter to as the "Turn of the Year."

There was only one hope for the old and weak, so gray and unlovely and helpless—hope that the old woman would come with its soft winding sheet to cover the unlighted of the dead face. Surely there would be snow for Christmas. "A green Christmas makes a full churchyard" the old people said grins, but no one could truthfully call this a green one it was one gray and leaden.

(To Be Continued.)

Keep Munsard's in the Medicine Chest

Over 2,500 acres of the area covered by Stockholm, Sweden, consist of parks and gardens.

When Mr. Douglas Fox, the musician, lost his right arm in the Great War, his friends thought he would never be able to play the piano again. The gentleman determined that he would play and has developed so amazing a technique, that with his recently gave a recital, in England, music critics said: "The first sensation is of surprise that a single hand can cover the keyboard so effectively and do so much; but soon we forget the limitations under which he is working, and think only of the beautiful and thoughtful music he makes."

The man who gave this remarkable recital is now director of music at Bradford College, England.

He: "Your cousin refused to recognize me last night. Thanks I'm not his cousin, I suppose."

She: "Idiotical! Of course you are. Why he is nothing but a con-artist!"

On fishing trips take Munsard's.

LESSON NO. 20

Question: Why is emul-sified cod-liver oil so very helpful as a vitamin-food for expectant and nursing mothers?

Answer: Because it provides an easily assimilated food rich in the essential vitamin that aids in building strong bones and good teeth.

Take pure, wholesome, pleasantly flavored SCOTT'S EMULSION

Robinson Crusoe's Error

Survey Shows Juan Fernandez Island Is Veritable Paradise

Robinson Crusoe and his man Friday should have remained on their island. A recent survey of Juan Fernandez Island, on which Alexander Selkirk, the original Robinson Crusoe, spent four years, proves it to be a veritable paradise.

The report says it is one of the most fruitful spots in South America with every imaginable sort of plant growing there. A Frenchman, shipwrecked on the island 15 to 20 years ago, had refused to leave because the ease with which he had been able to live.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother has a constant looking after the welfare of her little one. Childhood ailments come so sudden—sometimes without a minute's warning—that mothers may have a very sick baby on her hands when she least expects it. That is unless she has a remedy in the house which she can safely give the baby for any of the manifold ailments of babyhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for relieving baby's stomach; regulating his bowels, and thus driving away the complications of colic, colds and fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little one give him Baby's Own Tablets when he is ill, or better still, give him an occasional dose of the Tablets as a preventive measure. Tablets are sold by medicine dealers, but will be sent to any address, post paid, at 25 cents a box by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

On a Meat Diet

Stefansson Denies To Deconstruct That All Meat Diet Does Not Cause Scoury

Viktor Stefansson, Arctic explorer, has thrived for two weeks on an all-meat diet, his physician announced in New York. The explorer is under observation at Bellevue Hospital, where he is endeavoring to demonstrate that an all-meat diet does not cause scurvy.

Dr. Clarence W. Leach explained that the explorer's general condition has remained excellent since he began the experiment, which will be continued another fortnight.

Hard and soft costs both yield to Hollywood's art, and certain and satisfactory in its action.

Would Not Give Up

One-Armed English Musician Plays Piano With Left Hand

When Mr. Douglas Fox, the musician, lost his right arm in the Great War, his friends thought he would never be able to play the piano again. The gentleman determined that he would play and has developed so amazing a technique, that with his recently gave a recital, in England, music critics said: "The first sensation is of surprise that a single hand can cover the keyboard so effectively and do so much; but soon we forget the limitations under which he is working, and think only of the beautiful and thoughtful music he makes."

The man who gave this remarkable recital is now director of music at Bradford College, England.

He: "Your cousin refused to recognize me last night. Thanks I'm not his cousin, I suppose."

She: "Idiotical! Of course you are. Why he is nothing but a con-artist!"

On fishing trips take Munsard's.

LOSES FAITH IN COMMUNISM

Dutch Visitor Is Disillusioned After Visit To Russia

The Conservative press of Holland is rejoicing in the repudiation of Communism by the Dutch explorer known at the time of his expedition from the Dutch East Indies last September as "the firebrand of Java," where he had been the head of the subversive Soviet movement.

After his expedition he went to Russia in order to learn at first hand the political and social principles he had been advocating. This visit, judged from the point of view of a long article he has written for the Nieuwe Rotterdamse Courant, of Rotterdam, has resulted in his entire loss of faith in communism.

He says he considers it his duty on his return to Holland to advise the population of the Dutch East Indies, whom he himself had directed along the path of Communism, to retract their steps.

He found that the Soviet Government was able to do little for education and the care of the sick, despite all the fine slogans. As in capitalist countries all available money is first of all spent on the army, and further on the enormous bureaucratic apparatus.

"The incomes of farmers are very small. Nine-tenths of them have incomes of 25 rubles per month. Only one-tenth earn more than that."

Even the casual visitor must note that the great masses of the large cities are miserably poor. The shabby clothing, the old, repaired furniture, the accumulations of dirt can't possibly be kept concealed. Their status in regard to comfort, even of health, is much lower than it was in 1912. Anything can see that."

In 1927 there were 2,000,000 unemployed in Russia out of a total industrial population of nearly 15,000,000.

Case Of Asthma. No one can say just exactly exactly what causes the establishing of asthmatic conditions. But from the street, from the school and various other environments may set up a trouble in the individual except in the case of a pure preparation such as Dr. J. D. Kellogg's Asthma Remedy.

There is no cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from the scourge of the bronchial tubes. It is sold everywhere.

Homestead Filings For January

Homestead filings in the four Western Provinces in January showed a total of 457 as compared with 515 for the same month of 1927. Manitoba recorded 51 as compared with 36 for January 1927; Saskatchewan 194 as against 186; Alberta, 201, against 116; and British Columbia 116, against 6.

Winnipeg Live Stock Shipments

During January 1290 car loads of live stock were handled at the Union stock yards, St. Boniface (Greater Winnipeg). The shipments comprised 20,422 head of cattle, 47,277 hogs, 17,445 sheep and 1,420 horses.

PHILIPS

For Troubles Due to Acid

Acid indigestion, flatulence, heartburn, acid stomach, indigestion, constipation, etc.

Rich stomachs, poor stomachs and indigestion usually mean excess acid. The excess of acid makes the stomach and intestines sour.

Phillips' Acid Indigestion Remedy neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your indigestion condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Give this to your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Acid Indigestion Remedy.

CHAMPION CHATTER

VOL. 1

Thursday, Mar. 22, 1928

No. 6

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DUPUE, Editor.

EDITORIAL
We don't believe there is any merchant foolish enough to park his car in front of his place of business very long, but it strikes us that maybe we business men are not as careful of each other's interests as of our own. What do you say we try to keep our cars off the streets and give our country visitors a chance to park?

Our new McCormick-Deering press drill is meeting with the approval of lots of our farmers.

Wrecked So
Hush little hump top
Don't you cry
You'll smash a motor car
Bye and bye.

Of course its going to be a busy spring for lots of people but that

will have no terror for those who have a McCormick Deering tractor or to take care of the bulk of the spring operations.

"The plot thickens," said the old man as he sowed more grass seed. Seeding at the rate of an acre every 15 minutes—that is possible with our 28 market drill.

And March is marching right along.

Tony Ash is the proud purchaser of a McCormick-Deering 11 H.P. engine and pump jack. He says he must be able to depend on a full trough of water at all times.

Correct This Sentence
"I want my husband to employ the most beautiful stenographer he can find."

Ray Warren left an order for a 10-20 H.P. McCormick Deering tractor this week.

A little nonsense now and then is relished by the best of men.

We have been appointed local agents for two of the best tractor and auto oils on the market namely Veedol and Wm. Penn. We are firm believers in good oil.

H. E. Smith says, "A well oiled place is much like any other except that you pay \$10 for a 10¢ sandwich."

Of course we want your business, that's what we are here for, but we don't consider that you owe it to us just because we ARE here. Watch out for the community hall—its coming.

FRANK LEONG, Prop'r.

P. M. Patterson was in Edmonton this week on a business trip.

Mr. and Mrs. J. N. Beaulieu are expected home from California this week.

Geo. H. Stacey, of Lethbridge was a visitor here on Wednesday and Thursday.

Eight Mile Lake is again a magnificent body of water and promises to be higher still in the next few days.

While the roads are still far from good traffic has continued from all directions, although heavy loads are not being moved.

A considerable number of men have arrived here in the past few days and most of them have already been taken out to the farms.

Billy Bozarth wishes to thank those who visited him at the hospital during his recent illness, and also those who sent him flowers, which were highly appreciated.

Sunday and Monday were ideal days. It is doubtful if any country in the world could provide anything more attractive in the way of weather than such spring days.

Threshers are making preparations to begin operations at the earliest possible moment. The grain still in stock does not appear to have suffered but little injury by standing out all winter.

The Ladies' Aid will meet in the church on Thursday, March 29th. Owing to the condition of the roads the meeting which was to have been held at Mrs. N. McLeod's on March 22nd, was adjourned to the above date.

Mrs. R. I. Baker's C.G.T. group held a very successful tea on Saturday afternoon in the church. The church and tables were prettily decorated in honor of St. Patrick's Day and the waitresses were also adorned with shamrocks. The funds of the club will benefit substantially.

4 Great Advantages

Others would Pay Millions
to be Able to Give.

NO carbon troubles... No valve
grinding... Lower up-keep cost
... No periodic lay-ups... 4 great
advantages... The Willys-Knight
sleeve-valve engine ensures them all!

The sleeve-valve motor of the Willys-Knight is an exclusive feature which other manufacturers would pay millions to get... but it is protected by patent.

Instead of gradually losing in power and efficiency, in smoothness and silence, as so all cars of poppet-valve design, the sleeve-valve engine Willys-Knight actually improves with use. It grows quieter, more powerful and more efficient with every mile.

And now—Belflex Shackles—still another new and exclusive Willys-Knight feature—Belflex eliminates the metal shackles and provide that the sprung parts of the car are insulated from the unsprung parts with a noiseless, flexible fabric—shock absorbing, rubber-tied—thereby giving permanent chassis silence and diminishing wear at every point of the car.

770" Willys-Knight Six prices from \$1625 to \$1800; Willys-Knight Great Six, from \$2575 to \$3050; L.O.B. factory, Toronto, taxes extra
